

HASSAN TASLEEM

Java Developer

Email: hassantasleem210@gmail.com Address: Karachi/Sindh Contact: +923323256712 LinkedIn: [LinkedIn Profile](#)

OBJECTIVE

Motivated and skilled Java Developer with experience in designing, developing, and implementing high-quality software solutions. Seeking challenging opportunities to apply my expertise and drive continuous improvement. **I am also available for relocation.**

EDUCATION:

IQRA UNIVERSITY

Karachi/Sindh

Bachelor of Science in Computer Science (BSCS)

2023

Relevant Courses: Core Programming, Data Structure / Algorithms, AI, System Design, Software Engineering.

EXPERIENCE:

CENTEGY TECHNOLOGIES

Karachi/Sindh

Java Programmer

01-2024- present

- Led the design and development of APIs within a microservices architecture for critical services in the **Unilever S&D project**.
- Enhanced API performance and reduced latency by 20% by optimizing SQL queries and implementing circuit breaker patterns to prevent unnecessary calls, improving system security by 30%.
- Developed and fine-tuned 5 APIs for seamless data transfer between Excel and the database, achieving a 60% reduction in latency.
- Diagnosed and resolved over 60+ bugs through advanced debugging techniques, ensuring smoother application functionality.

BEFILER

Karachi/Sindh

Junior Java Developer

06-2023- 01-2024

- Developed and optimized APIs for the **Befiler** application, including critical components such as pricing and tax calculators.
 - Managed and enhanced over 30 key APIs for the **Thardeep loan application**, reducing latency by 30% through API and SQL query optimization.
 - Identified and resolved 30+ bugs using advanced debugging techniques, improving overall application stability and performance.
-

SKILLS:

Java, Spring Boot, Hibernate, Microservices, RESTful API, SOAP, Gradle, Maven, HTML/CSS, SQL, JDBC, PostgreSQL, MySQL, Jira, Tomcat, Debugging, Apache POE, Kafka, GitHub.

CERTIFICATIONS:

Coursera

Data Structures & Backend with Java (01/2024): Focused on Java programming, covering key areas such as data structures and backend development, including Spring Boot. Gained hands-on experience in designing and developing efficient backend systems. [Coursera Certificate](#)

Software Engineering Specialization (In-progress): Expanding knowledge in Software Testing, System Design, Project Management, and Project Planning through comprehensive coursework.

Software Design and Architecture Specialization (In-progress): Delving into Object-Oriented Design, Software Architecture, Service-Oriented Architecture, and Design Patterns.

ACHIEVEMENTS:

LeetCode: Solved **200+** problems on Data Structure and Algorithms. ID: [HASSAN TASLEEM](#)

Geek For Geek: Solved **100+** problems on Data Structure and Algorithms. ID: [HASSANTAS3MG3](#)
